

Some Misconception about Islam

Misconception # 1

Islam is very old, limited religion and it is not implacable to today's fast and modern lifestyle. Islam has become out of date religion as it is religion of Dark Age/ Stone Age.

Humans are of two things, number 1 its nature or you can say demands or needs and second the resources to fulfill these demands or needs. As we say we have changed we became modern but the thing is human nature does not change but resources does like the need of food, shelter, clothing are still same but type of food, way of living, way of clothing had changed .

Islam is 'Deen-e-Fitrat' and fitrat does not hange like the man of stone age centuries ago has same fitrat as man of this age has. So Islam cam never be an outdated religion

Misconception # 2

A question arises that Quran and Haadees didn't explain anything about science and tejnology. Why ?

To understand this why first we need to understand the sources of knowledge

There are three sources of knowledge:

Senses

Intellect

Revelation from Allah

Senses are big and foremost source of knowledge but it is limited. When all senses stops working then Intellect begins. But like senses intellect is also limited so where intellect stop working from there Revelation of Allah started.

Science is the field of experiment and observations (intellect) and Revelation of Allah started where intellect stop working.

Misconception #3

Total commands given in Quran are near 400 and Ahadees are 500 so total 800-900. Millions of people have billions of problems how can these unlimited problem be solved by these limited Ahkamat.

Principals are limited but problems are unlimited.

Ahkamat has 3 types

1. Quran and Sunnah which are unchangeable and are very clear (Touheed, Resalat)
2. Those teachings about which Shareeat does not say anything

3. Ijtehad (Ghor o Fkr) those problems whose solution are discussed and found by senior Islamic scholars. Total 1084000 problems are discussed and there solution is found.

Misconception # 4

Rationalism

Rationalism means principles based on Intellect and not in the light of any religion.

Like if business would be without interest. How economy will run?

Qurbani (Bakra eid) why killing innocent animals

The answer is where intellect stop working revelation of Allah started. Intellect is limited so we cannot totally rely on intellect for everything.
